YOUR GUIDE TO AFFORDABLE CONTAINER HOUSING

APOCAOUTPOST.COM - APOCAOUTPOST@GMAIL.COM

INTRODUCTION

We build sustainable off grid shipping container homes that are made to sustain life with our off grid systems that include our solar generators with a battery backup systems.

Every Shipping Container Home Outpost we build is fully sustainable with smart home integration. Everything is powered and monitored to your convenience. If it be for full time living or recreational use, we have an Outpost that can fulfill your goals.

We mainly focus on the recreational market, but we have half of our customers that wish to live in our containers full time, so now we have provided small and full sized homes depending on your design and budget.

No matter what your purpose may be, we will make sure that we can build you a home that is fully sustainable and affordable to meet your needs.

We welcome you to view our priced models in this catalogue and let us know how we can help you build your container home today.

UPGRADES

The only way we have made our homes as affordable as possible is that we make sure that your home is properly insulated with all the utilities needed for your power, kitchen, and bath.

The main thing to focus on in your upgrades is how you wish to setup your interior and exterior finishes on your unit.

On the exterior, you can either keep your home looking like a regular on the exterior with the rippled siding; or you can place insulated new tech siding that offers a modern, clean look to your home.

When it comes to the interior, we start off with a plywood finish that will look similar to a manufactured home with strips over the seams. We then have additional upgrades that can offer you either drywall or laminate finishes to add a clean modern look to the interior.

Finally there is our off grid upgrades so if you wish to be completely off grid, we have our full solar and water filtration system that allows you to make your home fully sustainable without having to rely on the grid,

Our upgrades are made to not only help work with your budget, but allows you to also choose what looks and styles truly work around your tastes.

FULL HOME SOLAR

We focus on making as many of our homes as fully sustainable so you do not have to worry about the increase of energy costs, rolling blackouts, and natural disasters,

These solar generators are made to plug into your home and provide the power that is needed during a disaster or for full time living.

DON'T GET RIPPED OFF BY SOLAR COMPANIES TO GET SMALL MONTHLY CHECKS, BUT SAVE POWER FOR YOURSELF

Premium 20' SINGLE WIDE \$47,500

These homes are made to be as functional as you can get within 160 sq ft. These homes come with a full kitchen that will make you feel as if you are still at home.

This kitchen comes with all basic appliances from the Fridge, Stove, microwave, and dishwasher,.

The bathroom also accomplishes the same purpose to still have enough room for a shower, sink, and toilet, but it also has a washer/dryer combo included.

If you want 160 sq ft that has it all, this one does.

Premium 20' SINGLE WIDE \$48,700

When you think you can only get one to 2 people to stay in about 160 sq ft of space, how about a couple adults and two kids.

This unit has its own separate room along with a hideabed in the living room to sleep 2 more.

Also the kitchen is just as amazing with all the basic appliances such as the fridge, stove, and microwave.

If you want a house that serves as many people as possible with minimal square footage, than this is it.

Premium 40' SINGLE WIDE \$62,700

Most of our customers are small families that have a family of 3-5 and many are on a limited budget to fit a family in whatever place they may live in.

Rental prices are skyrocketing and many do not wish to be stuck into month to month payments that are not getting invested into their property.

Now we have a small and simple enough of a home that you can invest your rental payments into tangible collateral that can house you and your family with still enough room to cook and lounge together.

If you wish to get a place of your own for your family, please contact us today.
